

**Центр Стекольных
Технологий**

Одним из способов декоративной обработки стекла является художественная пескоструйная обработка. Она позволяет из прозрачного стекла изготовить матовое, нанести любой узор на стекло или зеркало. Применяется пескоструйная обработка стекла при изготовлении офисных перегородок, витражей, зеркал и декоративной отделкой, стеклянных столешниц с рисунком, стекол для межкомнатных дверей, мебельных фасадов и т.д.

Данный вид обработки дает следующие возможности:

- нанесение пескоструйного напыления на стекло любой толщины, а также на узорчатое стекло, зеркало и стеклоблоки;
- изготовление различных рисунков, надписей, эмблем на стекле и зеркале;
- обработка полотен большого формата (3000*1550).

По желанию заказчика готовые изделия могут покрываться специальной жидкостью, защищающей пескоструйное напыление от жирных пятен.

Высококачественная пескоструйная обработка стекла дает возможность создать неповторимый интерьер, как в жилых, так и в административных помещениях. Именно поэтому изделия, к которым применяется пескоструйная обработка, пользуется повышенным спросом. Современная технология пескоструйной обработки позволяет изготавливать поистине уникальную продукцию. Преимущества, которыми обладает пескоструйная обработка, трудно переоценить. Благодаря профессиональной пескоструйной обработке на стеклянной поверхности создаются настоящие произведения художественного искусства.

В каталоге представлены рисунки разной сложности:

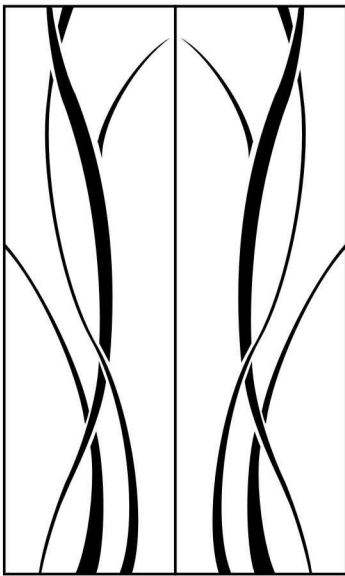

- /А - простой рисунок;
- /Б - рисунок средней сложности;
- /В - сложный рисунок;
- /Г - очень сложный рисунок;
- /Д - эксклюзивные рисунки.

Размеры представленных макетов:

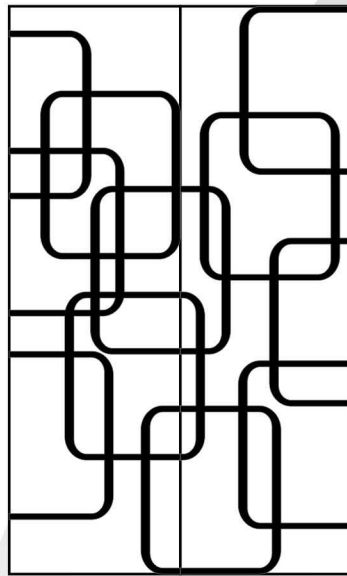

- Одна дверь - 2200*800
- Две двери - 2200*1600
- Три двери - 2200*2400
- Четыре двери - 2200*3200
